INFORMATION REGARDING MALE PHYSICIAN INVOLVEMENT CARE

Dear Patients,

Congratulations on your pregnancy and welcome to Women for Women! We look forward to offering you excellent care throughout your pregnancy and thereafter.

We are a group composed entirely of female physicians and we make every effort possible to attend the deliveries of our patients. However, it is important to note that we partake in a share call schedule with another group of Lankenau physicians, 3 of whom are men. During the evening hours and weekends while our call schedule is in effect there is a chance **you make have a male physician involved in your care.**

In addition, there are male residents and anesthesiologists who may also be present during your labor and delivery. These staff members are integral parts of the labor and delivery process, thus **we are unable to exclude these medical professionals from your care.**

We kindly ask that you sign this paper, acknowledging you have been informed of our policy and accept our terms.

We welcome discussion of any concerns that you may have.
